

**Joseph Chaiken**  
**Complete List of Publications**

Chaiken, J.; Benson, T.; Gurnick, M.; McDonald, J. D. Quantum Beats in Single Rovibronic State Fluorescence of Biacetyl. *Chem. Phys. Lett.* **1979**, *61(1)*, 195-198.

Chaiken, J.; Gurnick, M.; McDonald, J. D. Statistical Analysis of Polyatomic Quantum Beats Using the Properties of Random Matrices. *J. Chem Phys.* **1981**, *74(1)*, 117-122.

Gurnick, M.; Chaiken, J.; Benson, T.; McDonald, J.D. Vibrational and Rotational Spectroscopy of the First Electronically Allowed Transition of the  $\alpha$ -Dicarbonyls. *J. Chem. Phys.* **1981**, *74(1)*, 99-105.

Chaiken, J.; Gurnick, M.; McDonald, J. D. Average Singlet-Triplet Coupling Properties of Biacetyl and Methylglyoxal Using Quantum Beat Spectroscopy. *J. Chem Phys.* **1981**, *74(1)*, 106-116.

Gurnick, M.; Chaiken, J.; McDonald, J. D. Vibrational Relaxation and the Statistics of Triplet States and Matrix Elements in Methylglyoxal. *J. Chem Phys.* **1981**, *74(1)*, 123-6.

Chaiken, J.; McDonald, J. D. High Resolution Fluorescence Excitation and Quantum Beat Spectroscopy of the First Electronically Allowed Transition of Perdeuteromethylglyoxal. *J. Chem Phys.* **1982**, *77*, 663.

Chaiken, J.; McDonald, J. D. Quantum Beat Spectroscopy. *Advances in Laser Spectroscopy* **1982**, *1*, 177-195.

Hossenlopp, J. M.; Rooney, D.; Samoriski, B.; Bowen, G.; Chaiken, J. The Competition Between Optical Pumping and Intramolecular Vibrational Relaxation in Organometallics: A New Chromium Rydberg Series. *Chem. Phys. Lett.* **1985**, *116(5)*, 380-386.

Hossenlopp, J. M.; Samoriski, B.; Rooney, D.; Chaiken, J. Intramolecular Vibrational Relaxation in n-Alkyl Benzene Chromium Tricarbonyls: State Selective Production of Chromium Atoms. *J. Chem Phys.* **1986**, *85(6)*, 3331-37.

Samoriski, B.; Hossenlopp, J. M.; Rooney, D.; Chaiken, J. The Effect of Deuteration on the Multiphoton Dissociation of Benzene Chromium Tricarbonyl. *J. Chem Phys.* **1986**, *85(6)*, 3326-3330.

Hossenlopp, J. M.; Chaiken, J. Collisional Effects in Organometallic MPD/MPI Experiments: The Modeling of Townsend Discharges. *J. Phys. Chem.* **1987**, *91(11)*, 2825-2831.

Chaiken, J.; Hossenlopp, J. M.; Samoriski, B.; Rooney, D. Multiphoton Dissociation/Ionization of Organometallics: The Effect of Intramolecular Vibrational Relaxation. *Proc. SPIE* **1987**, *742*, 102-109.

Rooney, D.; Chaiken, J.; Driscoll, D. Gas-phase one-photon electronic spectroscopy of (arene)chromium tricarbonyls: substituent effects in multiphoton dissociation/ionization spectra. *Inorg. Chem.* **1987**, *26*(23), 3939-3945.

Samoriski, B.; Chaiken, J. Observation and Assignment of  $7D$ ,  $7P^0$  and  $7S$  Rydberg Series of Molybdenum Atoms by Multiphoton Dissociation/Ionization Spectroscopy of Organometallic Molecules. *Phys. Rev. A*, **1988**, *38*(7), 3498-3503.

Samoriski, B.; Chaiken, J. Structure Dependent Competition Between Multiphoton Absorption and Intramolecular Energy Redistribution in Organomolybdenum Compounds: State Selective Production of Molybdenum Atoms. *J. Chem Phys.* **1989**, *90*(8), 4079-4090.

Vook, R. W.; Brumberger, H.; Chaiken, J.; Park, C. W.; Burton, R. Characterization of Vitreous Carbon Having Ultra Low Friction and Wear. *Proceedings International Conference on Electrical Contacts and Electromechanical Components* (Beijing) **1989**.

Rooney, D.; Negrotti, D.; Byasee, T.; Macero, D.; Chaiken, J. Use of Laser Directed Chemical Vapor Deposition to Fabricate Durable, Optically Transparent, Platinum Thin Film Electrodes. *J. Electrochem. Soc.* **1990**, *137*(4), 1162-1166.

Rooney, D.; Chaiken, J. Observation of Collisional Ionization of Chromium Atoms in High Rydberg States and the  $N^4$  Scaling Relation. *J. Chem. Phys.* **1990**, *93*(1), 466-478.

Samoriski, B.; Wiedeger, S.; Villarica, M.; Chaiken, J. Metal Vapor Gain Media Based on Multiphoton Dissociation/Ionization of Organometallics. *Proc. SPIE* **1991**, *1412*, 12-18.

Daniszewski, E.; McCalmont, J.; Chrostowski, A.; Chaiken, J. Intracavity Laser Absorption Spectroscopic Investigation of Barium Desorption From Dispenser Cathodes. *J. Appl. Phys.* **1991**, *70*(5), 2812-2819.

Hossenlopp, J. M.; Storne, K. A.; Chaiken, J. VUV Emission Detection of Organometallic Multiphoton Ionization and Discharge Processes in Bulk Gases. *J. Phys. Chem.* **1992**, *96*, 2994-3000.

Chaiken, J.; Casey, M. J.; Villarica, M. Laser Chemistry of Organometallics as a General Synthetic Route to Metal Cluster Compounds. *J. Phys. Chem.* **1992**, *96*(8), 3183-3186.

Casey, M. J.; Chaiken, J.; Osman, J. M. Nonlinear Interface Optical Switches Based on Photorefractive Thin Films. *Proc. SPIE* **1992**, *1626*, 217-25.

Osman, J. M.; Chaiken, J.; DeVaul, B. Ultrafast Optical Switch Evaluation Facility. *Proc. SPIE* **1992**, *1757*, 74-81.

Chaiken, J., Editor. "Laser Chemistry of Organometallics", Vol. 530, ACS Symposium Series, (American Chemical Society, Washington, 1993)

Chaiken, J. Laser Chemistry of Organometallics: Conceptual Framework and Overview. *ACS Symposium Series*, **1993**, *530*, 1-24.

Villarica, M.; Casey, M. J.; Goodisman, J.; Chaiken, J. Application of Fractals and Kinetic Equations to Cluster Growth. *J. Chem. Phys.* **1993**, *98*(6), 4610-4625.

Chaiken, J. Laser Chemical Synthesis of Cluster and Ultrafine Particles using Organometallics. *Appl. Organomet. Chem.* **1993**, *7*(3), 163-172.

Chaiken, J. Laser Chemistry of Organometallics. *Chem. Ind-London*, **1993**, *19*, 751-3, 756-7.

Goodisman, J.; Chaiken, J. Application of Fractals and Kinetic Equations to Cluster Growth. *J. Photochem. Photobio., A.* **1994**, *80*(1-3), 53-59.

Chaiken, J.; Goodisman, J. Application of Fractals and Kinetic Equations in Modeling Cluster and Ultrafine Particle Size Distributions. *Mat. Res. Soc. Proc.* **1994**, *351*, 355-359.

Chaiken, J.; Goodisman, J. Application of Fractals and Kinetic Equations in Modeling Cluster and Ultrafine Particle Size Distributions. *Nanostruct. Mat.* **1995**, *5*(2), 225-31.

Chaiken, J.; Goodisman, J. Use of Fractals and Kinetic Equations to Model Thermally Induced Hillock Formation and Growth in Thin Metal Films. *Thin Solid Films* **1995**, *260*(2), 243-251.

Chaiken, J.; Goodisman, J.; Villarica, R. M.; Beasock, J. V.; Walsh, L. H. AFM/SEM Study of Thermally Induced Hillock Coalescence. *Proc. Mat. Res. Soc.* **1995**, *356*, 489-494.

Chaiken, J.; Goodisman, J. Interpreting Magic Number and Evaporation Effects in Cluster Size Distributions. *J. Cluster Sci.* **1995**, *6*(2), 319-342.

Chaiken, J.; Villarica, R. M.; Goodisman, J.; Walsh, L. H.; Thomas, R. W.; Calabrese, D. W. Direct Observation of the Fractal Dimension of Voids Formed by Electromigration in Thin Metal Films. *Polym. Mater. Sci. Eng.* **1995**, *73*, 73-4.

Villarica, R. M.; Nash, F.; Chaiken, J.; Osman, J.; Bussjager, R. Reversible Photoredox Processing of Transition Metal Oxides. *Proc. Mat. Res. Soc.* **1996**, *397*, 347-352.

Villarica, R. M.; Samoriski, B.; Chaiken, J.; Novick, S. E. Translational Energy Release Following Multiphoton Dissociation of Organometallics. *Appl. Surf. Sci.* **1996**, *106*, 99-107.

Bussjager, R.; Osman, J.; Villarica, M.; Chaiken, J. Material for Optical Memory. *Proc. SPIE* **1997**, *3075*, 34-46.

Osman, J. M.; Bussjager, R. J.; Nash, F.; Chaiken, J.; Villarica, R. M. Photoredox Laser Chemistry of Transition Metal Oxides. *Appl. Phys., A.* **1998**, *66*(2), 223-238.

Bussjager, R.; Osman, J. M.; Chaiken, J. One and Two Color Photorefractive Processes in Sputtered WO<sub>3</sub> Films. *Proc. Mat. Res. Soc.* **1998**, *495*, 339-344.

Cote, M. J.; Radloff, C.; Osman, J. M.; Bussjager, R.; Villarica, R. M.; Nash, F.; Chaiken, J. A Surface Raman-STM Study of the Spatial Distribution of Photoredox Sites on Thermally Oxidized Tungsten. *Proc. Mat. Res. Soc.* **1998**, *495*, 413-418.

Bussjager, R.; Osman, J.; Chaiken, J. A Nonlinear Interface Optical Switch Structure for Dual-Mode Switching Revisited. *Proc. SPIE* **1998**, *3384*, 137-147.

Bussijager, R.; Chaiken, J.; Getbehead, M.; Gruzca, D.; Hinkel, Capt. D.; McEwen, T.; Osman, J.; Voss, E. Using Tungsten Oxide Based Thin Films for Optical Memory and the Effects of Using IR combined with Blue/Blue-Green Wavelengths. *Jpn. J. Appl. Phys.* **2000**, *39(2B)*, 789-796.

Bussjager, R.; Osman, J.; Chaiken, J.; Getbehead, M.; Hinkel, Capt. D.; McEwen, T. Examination of Tungsten Oxide Based Thin Files for Optical Memory. *Proc. SPIE* **1999**, *3864*, 249-251.

Chaiken, J.; Finney, W. F.; Peterson, K.; Peterson, C.; Knudson, P. E.; Weinstock, R. S.; Lein, P. Noninvasive, in-vivo, near infrared vibrational spectroscopic study of lipid and aqueous phases of skin and near surface tissues. *Proc. SPIE* **2000**, *3907*, 89-97.

Chaiken, J.; Finney, W. F.; Peterson, C. M.; Peterson, K. P.; Knudson, P. E.; Weinstock, R. S.; Lein, P. Noninvasive in-vivo tissue modulated near-infrared vibrational spectroscopic study of mobile and static tissues: blood chemistry. *Proc. SPIE* **2000**, *3918*, 135-143.

Chaiken, J.; Finney, W. F.; Knudson, P. E.; Peterson, K. P.; Peterson, C. M.; Yang, X.; Weinstock, R. S. Noninvasive in-vivo tissue modulated Raman spectroscopy of human blood: microcirculation and viscosity effects. *Proc. SPIE* **2001**, *4254*, 106-118.

Chaiken, J.; Finney, W. F.; Yang, X.; Knudson, P. E.; Peterson, K. P.; Peterson, C. M.; Weinstock, R. S.; Hagrman, D. Progress in the noninvasive in-vivo tissue modulated Raman spectroscopy of human blood. *Proc. SPIE* **2001**, *4254*, 216-227.

Chaiken, J.; Finney, W. F.; Yang, X.; Peterson, K.; Peterson, C.; Knudson, P. E.; Weinstock, R. S. Hagrman, D. Noninvasive blood analysis by tissue modulated Raman spectroscopy. *Proc. SPIE* **2001**, *4368*, 134-145.

Chaiken, J.; Voss, E.; Osman, J. M.; Bussjager, R. J. Enabling photonic technologies based on electrochromic and photochromic tungsten oxide. *Proc. SPIE* **2001**, *4386*, 150-160.

Chaiken, J.; Finney, W. F.; Knudson, P. E.; Weinstock, R. S.; Khan, M.; Bussjager, R. J.; Hagrman, D.; Hagrman, P.; Zhao, Y.; Peterson, C. M.; Peterson, K. The effect of hemoglobin concentration variation on the accuracy and precision of glucose analysis using tissue modulated, noninvasive, *in vivo* Raman spectroscopy of human blood: a small clinical study. *J. Biomed. Opt.* **2005**, *10(3)*, 31111.

Chaiken, J.; Ellis, K.; Eslick, P.; Piacente, L.; Voss, E. Noninvasive in vivo tissues and pulse modulated Raman Spectroscopy of human capillary blood and plasma. *Proc SPIE* **2006**, *6093*, 609305.

Goodisman, J.; Chaiken, J. Scaling and the Smoluchowski Equations. *J. Chem. Phys.* **2006**, *125*(7), 074304.

Chaiken, J.; Goodisman, J.; Kornilov, O.; Toennies, J. P. Application of Scaling and Kinetic Equations to Helium Cluster Size Distributions: Homogeneous Nucleation of a Nearly Ideal Gas. *J. Chem. Phys.* **2006**, *125*(7), 074305.

Chaiken, J.; Voss, E.; Bussjager, R. J.; Shaheen, G. Towards an Improved Assignment of Spectral Features in Tissue Modulated Non-Invasive Raman Spectroscopy of Human Fingertips. *Proc. SPIE* **2007**, *6430*, 643004.

Chaiken, J. Laser Chemistry: Spectroscopy, Dynamics and Applications, edited by Helmut H. Teele, Angel Gonzalez Urena, and Robert J. Donovan. *J. Am. Chem. Soc.* **2007**, *129*(46), 14525-14526.

Chaiken, J.; Goodisman, J.; Deng, B.; Bussjager, R. J.; Shaheen, G. Simultaneous, noninvasive observation of elastic scattering, fluorescence and inelastic scattering as a monitor of blood flow and hematocrit in human fingertip capillary beds. *J. Biomed. Opt.* **2009**, *14*(5), 050505.

Chaiken, J.; Deng, B.; Bussjager, R. J.; Shaheen, G.; Rice, D.; Stehlik, D.; Fayos, J. Instrument for near-infrared emission spectroscopic probing of human fingertips *in vivo*. *Rev. Sci. Instrum.* **2010**, *81*(3), 034301.
